Full-Stack Developer (React + Node.js)

Meridian Digital — Dubai, UAE · on-site/hybrid

About the role

We're a product company building web apps for regional clients. We need a full-stack developer who can own features end to end across our React front-ends and Node.js services.

Required

- 3+ years building production web apps with **React** and **Node.js**
- Strong JavaScript/TypeScript and REST API design
- Solid SQL database experience (PostgreSQL or MySQL)
- Git, basic CI/CD, and good written English

Nice to have

- AWS or other cloud deployment experience
- Startup / fast-paced product experience
- React Native or mobile exposure
